

S&OP Implementation Package

What is it?

SCM Connections' S&OP Implementation Package makes sales and operations planning simple. The package is available for a one-time fixed fee and **includes all the tools, training, and 1-year SAP license** you will need to achieve a cohesive S&OP process. Our implementation team prides itself on providing the best service in the industry, and the training your organization needs so that you can get the most out of your S&OP process.

Why SCM Connections?

SCM Connections is a leading North American APO & IBP implementation provider. Our team of dedicated consultants has the expertise to deliver solutions that actually remove roadblocks to your supply chain instead of adding them.

We take pride in helping to simplify the implementation process and providing you the training and documentation you will need to effectively manage our solutions on your own.

Our team focuses on driving value for your business through improved forecast accuracy, effectively balance demand and supply targets, and flexible planning capabilities.

Drive value for your organization

- Improved forecast accuracy and demand planning
- Build team consensus for demand planning at any level
- Update your product forecasts on-the-fly in real time
- Real-time "What If" scenario planning for market changes
- Perform material and capacity planning with confidence
- Advanced financial and supply chain reporting capabilities

*Extra configuration to be quoted as requested

Hear from our raving fans

"SCM Connections was an outstanding resource for PBV's IBP Demand implementation. The Senior Analyst provided critical data analysis and modeling recommendations for the IBP Demand forecasts. Their work allowed us to efficiently select the right forecast levels and best models for our data sets. With SCMC's support, we were able to successfully launch IBP Demand and immediately achieve results that were significantly improved over our previous forecasting tool."

- Director of Supply Chain Planning
