IGNITE YOUR SUPPLY CHAIN!

SPARK ★

SCM Planning Accelerator Resource Kit

Packaged Solutions for S&OP, Demand, Inventory Optimization, and Supply. Go Live with SAP IBP in Just 12 Weeks!

SAP Integrated Business Planning (IBP) is a leading solution for advanced supply chain planning. IBP is highly customizable, and configuring the system down to every last detail can often lead to uncertainty around implementation timelines and potential budget creep. Intimidated by implementing such a robust system? Worried your company doesn't have the bandwidth or expertise? **That's why SCM Connections created SPARK**.

SPARK packages for SAP IBP are SAP approved, preconfigured IBP packages that make supply chain planning simple and effective. SPARK will have you up and running with SAP IBP in just 12 weeks with NO surprises. All at a fixed cost, fixed scope, fixed timeline and no risk to your business. You'll get all the best features of SAP IBP at a price you can afford.

SPARK is the leading SAP IBP packaged solution available in the market and the first **SAP Qualified Partner-Packaged Solution** for IBP. It's a 'plug and play', turnkey solution, including templates, configuration, dashboards, and training.

Choose from 4 modules: **Demand**, **Supply**, **S&OP**, and **Inventory Optimization**. Each package is a foundation that can grow with your business needs and complexity. And as an Excel-based app that works with any data source system, you'll get rapid adoption and maximum usability. SPARK is the easiest way to IBP!

Contact one of our supply chain experts at SCM Connections to learn more about SPARK and start leveraging the benefits of SAP IBP in your supply chain.

S&OP
IBP resources and battle-tested business process flows that put everyone on the same page. This package walks your team through master data cleansing and statistical forecasting to arrive at an unconstrained demand plan, and then reconciles that plan with the real world constraints of a complex supply chain.

Demand
The first step towards a demand-driven supply chain is accurately predicting demand, and our Demand SPARK package makes it easy. We offer resources to simplify data cleansing, compare forecasting levels and algorithms, and collaborate between business units.

Inventory Optimization
Allows you to minimize inventory costs while still meeting your target service level. You can run what-if scenarios to test the impact of changing policies, analyze the effects of variability in the supply chain, create custom alerts, and more— all through a familiar front-end interface.

Supply
Effective resource utilization. Minimized production lead times. Finished goods out the door. That's the bottom line. Our Supply SPARK will change the way you look at operations, helping your business meet demand while optimizing production and transportation schedules to minimize unnecessary costs.

ALL IN ONE PACKAGE— THE EASIEST WAY TO IBP

Everything you need to get up and running with SAP IBP:

Configuration, templates, dashboards, and training. Ready to work for you, all at one fixed price.

We've taken industry best practices and the solutions we have created for early IBP adopters and molded them together into a 'plug and play' solution by IBP module.

SAP® Qualified
Partner-Packaged Solution
